

# Adherence from Start to Finish

Rx Savings Solutions helps members take prescribed medications on schedule and as directed—for better health outcomes and to lower the \$100-\$300 billion in avoidable healthcare costs attributed to nonadherence.<sup>1</sup>

## 1. START WITH AFFORDABILITY

Patients are more likely to adhere when they can afford the drugs they're prescribed. Our patented software, 15,000+ pharmacist-curated savings suggestions, and proactive communications ensure members can find the **lowest-cost therapies**.

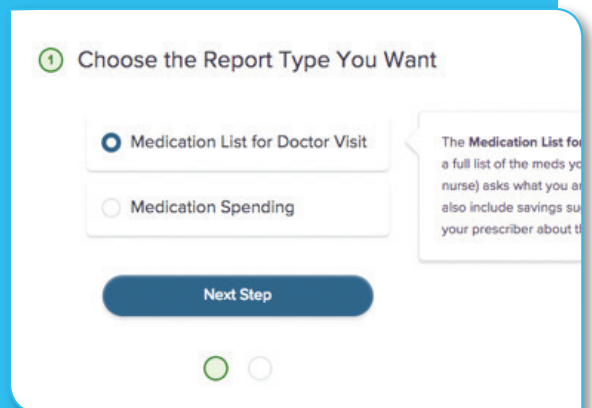

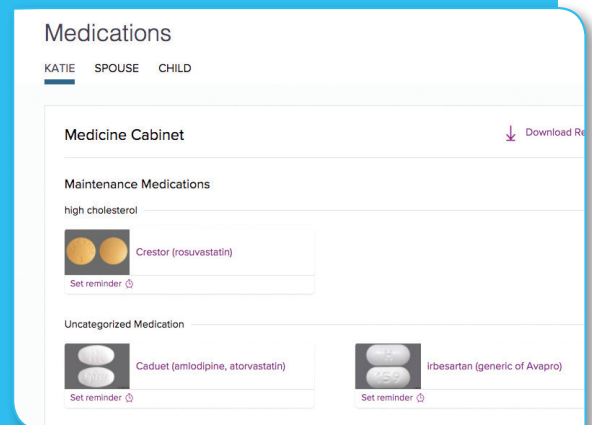

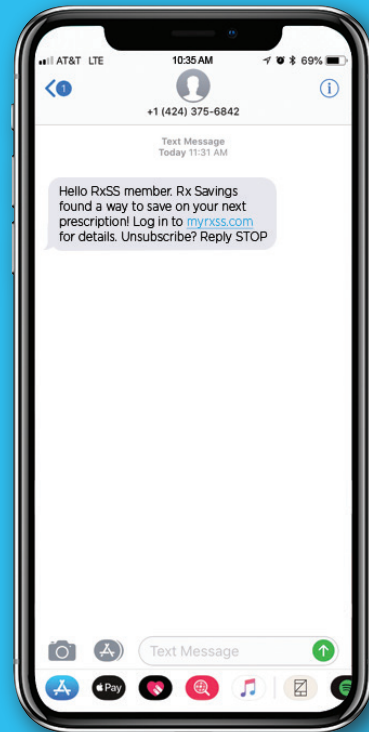

## 2. STAY ORGANIZED

The **Medicine Cabinet** feature organizes all member prescriptions into one virtual display. Medication names, strength, dosage and quantity are populated automatically based on claims. No manual entry required—and no chance for clinical error. Medication reminders can be set directly within the Medicine Cabinet.

## 3. KEEP DOCTORS INFORMED

**Medication Reports** allow members to easily download, print, send or view the complete list of all medications—each with associated savings suggestions—prior to or during a doctor visit or while at the pharmacy counter.

## 4. SET A FRIENDLY REMINDER

“I forgot.” That’s how 52% of respondents answered when asked why they missed a dose of a prescribed drug.<sup>2</sup> The **Medication Reminders** feature allows members to set convenient and customized text or push notifications reminding them to take everything in their Medicine Cabinet on schedule.

The image shows three views of the Medication Reminders feature. On the left is a desktop interface for setting a reminder for 'Crestor 5mg Tablet' at 10:00 p.m. with options for Morning, Afternoon, Evening, and Night. In the center is a smartwatch displaying a notification: 'It's that time again! Take your 10:00 p.m. medication, then track it at Rx Savings Solutions.' On the right is a desktop notification for Thursday, Feb. 22, saying 'Good Evening! It's time to take your medication(s)' and listing 'Crestor 5mg Tablet' and 'Omeprazole (generic of Prilosec) 20mg' with a 'Dismiss' button and an 'I've Taken My Medication(s)' button.

## 5. TRACK PERFORMANCE

The **Report Card** feature helps the member track their adherence performance statistics for a given month and over their entire duration on the medication. They can also see how they measure up against the entire Rx Savings Solutions member community.

## 6. REFILL AND REPEAT

Members are alerted as refill dates approach: days remaining or past due. **Coming soon:** reports for physicians that include a member’s adherence over the past 12 months, giving member and physician a quick view of recent refill history.

The image shows two parts of the interface. The top part is the 'Your Report Card' for 'This Week', showing adherence for Sunday, Monday, Tuesday, Wednesday, Thursday, and Friday. Below are three donut charts: 'This Month 78%', 'All Time 79%', and 'Community 30%'. The bottom part is a notification: 'It's time to refill your medication.' with a pill bottle icon and text: 'According to our claims data, you last refilled your medication on [date]. This means you should be due for a refill in 5 days. [See your prescription details.](#)'
